## Installation Technician

### Description

We are seeking driven individuals to perform the installation, troubleshooting, and maintenance of wired and wireless network systems for commercial clients. The installation work will include pre-wire, trim out, and final installation. We also test structured wiring, telephone, IP cameras, and wired/wireless networks. Applicants should be motivated self-starters with the ability to follow directions and translate written instructions/work orders into finished products.

### Responsibilities

- Wire pulling in new and existing construction
- Wire terminations knowledge are required
- Knowledge and understanding of cable types
- Experience mounting rack cabinets as well as flat panel displays and projectors
- Must be able to pre-wire within established guidelines, follow quality control standards and written specifications
- Must be willing to work within deadlines and work well with other trades and peers
- Proficient use of trade tools and ability to follow safety standards while working on constructions sites and finished homes

### Qualifications

- Must have strong communication and customer service skills
- Must possess a clean professional appearance and positive attitude
- Must be able to accurately read wiring diagrams
- Must have all tools needed for installations and service
- Must have reliable transportation and be willing to travel with a clean driving record, a valid driver's license with proof of insurance
- Must be able to safely lift up to 75 pounds, work in confined spaces (attics, crawl spaces, etc) in varied weather conditions
- Must have at least 1+ years in the Data Cabling Installation industry as a field installer
- High School diploma or equivalent required
- Computer proficiency required
- Construction industry knowledge

### Job Benefits

- We offer competitive wages
- Outstanding long term career opportunities with room for advancement for the right individuals.
